Subject Index

Allocative efficiency
  input, 53, 147, 187, 211
  output, 57, 211, 248, 250

Cost efficiency
  and productivity change, 287
  decomposition, 54, 158, 221, 255
  definition, 51
  estimation
    cross-sectional models, 136, 218
    distribution-free approach, 179
    panel data models, 166, 254
    thick frontier analysis, 176
  variable, 61, 144
Cost frontier
  definition, 33
  deterministic, 137
  stochastic, 9, 137
  variable, 41, 144
Cross-sectional models
  corrected ordinary least squares, 70
  goal programming, 66
  maximum likelihood, 7, 9, 67, 68, 74, 139, 189, 237, 267, 286
  method of moments, 90, 110, 113, 124
  modified ordinary least squares, 71, 91
  seemingly unrelated regressions, 155, 177, 179, 200, 212, 227, 295
  shadow price approach, 218
  thick frontier analysis, 176

Distance functions
  input, 28, 220
  output, 30, 205, 220
  stochastic, 93, 309

Distributions
  exponential, 7, 8, 67, 68
  gamma, 7, 9, 69, 87
  half normal, 7, 8, 68, 69
  normal, 75
  normal–exponential, 80, 81
  normal–gamma, 86
  normal–half normal, 74, 76
  normal–truncated normal, 82, 85
  truncated normal, 9, 84

Heteroskedasticity
  and exogenous influences on efficiency, 272
  cross-sectional models, 116
  panel data models, 122, 126

Likelihood functions
  exponential, 68
  half normal, 68
  normal–exponential, 81
  normal–gamma, 89
  normal–half normal, 77
  normal–truncated normal, 85

Panel data models
  distribution-free approach, 179
  fixed effects, 10, 97, 108, 168
  maximum likelihood, 10, 102, 110, 169, 258, 295
  method of moments, 113
  random effects, 10, 100, 108, 168
  seemingly unrelated regressions, 177, 179, 200, 212, 295
  shadow price approach, 254

  technical change, 107, 286
  thick frontier analysis, 176
  time-invariant technical efficiency, 10, 97
  time-varying technical efficiency, 10, 108, 286
Production frontier
  definition, 26
  deterministic, 7, 66
  joint, 26
  stochastic, 8, 72
Production technology
  graph, 18
  input efficient subsets, 23
  input isoquants, 23
  input sets, 21
  output efficient subsets, 24
  output isoquants, 24
  output sets, 22
Productivity change
  dual cost-based decomposition, 288
  dual cost-based estimation, 294
  dual profit-based decomposition, 299
  dual profit-based estimation, 302
  primal decomposition, 282
  primal estimation, 285
Profit efficiency
  and productivity change, 299
  decomposition, 60, 192, 209
  definition, 58
  estimation
    dual approach, 192, 209
    multiple output models, 205
    primal approach, 186, 205
    single output models, 186
  variable, 61, 192

Profit frontier
  alternative, 212
  definition, 38
  normalized, 40, 194, 211
  variable, 41, 192

Revenue efficiency
  decomposition, 57
  definition, 54
Revenue frontier
  definition, 35

Shadow price approach
  cross-sectional models
    cost efficiency, 221
    profit efficiency, 239
  panel data models
    cost efficiency, 255
    profit efficiency, 258
Stochastic frontier analysis
  developments since 1977, 9
  intellectual antecedents, 5
  origins, 8

Technical efficiency
  and productivity change, 283, 289, 297, 300, 306
  definition, 43
  estimation
    cross-sectional models, 64
    panel data models, 95
  exogenous influences
    early approaches, 262
    recent approaches, 266
  input oriented, 43, 46, 49
  output oriented, 43, 46, 49
